ABOUT ME

In 2012 I finished my Advance Diploma in Graphic Design at the Central Institute of Technology. Afterwards I worked as a web and application designer for The Frontier Group. For the next 3 years I'd learn to code (HAML & SASS) and design thoughtful user interfaces and experiences.

In 2016 I packed up my ps4 and cat and moved to Melbourne as I was accepted into the Textile Design course at RMIT. In between my studies I do collaborations with other artists and freelance as a web designer.
